Chemistry: Periodic Trends & Structures

Definition:

Electronegativity is the tendency of an atom to attract shared electron pairs.

Key Explanation:

Periodic trends follow: $F > O > N > Cl$. Reaction mechanisms involve the transition states of organic molecules.

Visual Snippet:

Source: Chemistry_Notes.pdf (Page 1)

Example:

Reaction: $C_2H_5OH + HCl \rightarrow C_2H_5Cl + H_2O$

Study Intelligence & Dependencies:

- Completeness: 100% | Confidence: 8/10

Physics: Derivations & Circuits

Definition:

Ohm's Law states that current is directly proportional to voltage.

Key Explanation:

The circuit diagram below shows resistors in series where $R_{\text{total}} = R_1 + R_2 + R_3$.

Visual Snippet:

Source: Physics_Notes.pdf (Page 2)

Example:

$$V = I \cdot R$$

Study Intelligence & Dependencies:

- Completeness: 100% | Confidence: 9/10

Mathematics: Calculus & Matrices

Definition:

A limit is the value that a function approaches as the input approaches some value.

Key Explanation:

The integration by parts formula: $\int u \, dv = u \cdot v - \int v \, du$.

Visual Snippet:

Source: Math_Notes.pdf (Page 5)

Example:

Matrix $A = \begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$

Study Intelligence & Dependencies:

- Completeness: 100% | Confidence: 9/10

Biology: Organelle Structures

Definition:

Mitochondria are double-membraned organelles responsible for ATP synthesis.

Key Explanation:

The labelled diagram shows outer membrane, inner membrane, cristae, and matrix.

Visual Snippet:

Source: Biology_Notes.pdf (Page 8)

Example:

Cell Respiration cycle

Study Intelligence & Dependencies:

- Completeness: 100% | Confidence: 8/10
